Business Documentation & Projects

Basic Pickup Record / Equipment Inventory	Included
Detailed Asset Inventory / Serial Tracking For organizations requiring asset-level reporting.	Custom quote
Large Office / IT Cleanout Office refreshes, server rooms and larger removal projects.	Custom quote

RECYCLING FEES

Most standard IT equipment: generally no recycling fee when included in a qualifying pickup. Computers, laptops, servers and networking equipment are prioritized for reuse and repurposing whenever possible.

Specialty or low-value equipment: monitors, televisions, printers, batteries, damaged equipment, unusually large quantities and certain other electronics may carry recycling or handling fees. Pricing is confirmed before pickup.

Pricing notes: Prices shown are starting rates and may vary based on quantity, equipment condition, location, accessibility and project requirements. Any applicable charges are confirmed before service. A Certificate of Data Destruction documents the destruction service; it is not a claim that TechCycle360 holds a specific recycling or data-destruction certification.
